

Mauritius Oral Test Study Pack

Your first 10-minute route through signs, rules and signals.

START HERE

You do not need to know everything at once. Learn one repeatable method, practise it on unfamiliar scenes, then check anything official at the source.

READ > NOTICE > EXPLAIN > CHOOSE SAFELY

YOUR ROUTE

One test. Three things to understand.

The official learner path places the Audio Visual Test before practical testing. This pack helps you prepare for the learning part without pretending to reproduce an official exam.

1

SIGNS

Read the road message. Is it warning, informing, requiring, restricting or prohibiting?

2

RULES

Read the situation. Find the hazard and the rule clue before choosing.

3

SIGNALS

Observe who is signalling, who is affected and what else is happening.

THE METHOD TO REMEMBER

NOTICE > INTERPRET > RESPOND

What do I actually see? What message does it carry? What is the safest lawful response?

USE THIS EVERY TIME

Do not race the screen.

A quick answer is not useful if it skips the road message. Slow the decision down into three visible moves.

01

NOTICE

Name what is present: a sign, marking, driver action, police signal or road situation.

02

INTERPRET

Say the message in your own words before looking for an answer pattern.

03

RESPOND

Choose the safe, lawful action that fits the whole scene.

TRY IT OUT LOUD

I notice ____.

It means ____.

The safer response is ____ because ____.

READ THE MESSAGE

A sign is more than a shape.

Start with the type of message. Then use its position, markings and the surrounding road scene to work out what it asks of you.

 WARNING What danger may be ahead?	 INFORMATION What does this help me understand?	 REQUIREMENT What action is required?	 RESTRICTION What is limited here?	 PROHIBITION What must not happen?
--	---	---	--	--

ONE-MINUTE PRACTICE

Before naming a sign, say what the road is communicating.

CLUE What do the shape, position, markings and traffic add?

ACTION What should a careful driver prepare to do?

THINK IN CONTEXT

Find the risk before the rule.

Road-rule questions become easier when you identify what could change, who could be affected and which clue controls the decision.

1

SLOW

Do not choose the fastest-looking answer.

2

FIND THE HAZARD

What could be affected by your next movement?

3

FIND THE CLUE

Use the sign, marking, signal or situation.

4

CHOOSE LOW RISK

Explain how your action protects road users.

ASK YOURSELF

What can I see? What can I not see? What could change before I move?

OBSERVE FIRST

A signal is part of a whole scene.

Do not respond as though you are the only person on the road. Read the source, direction and context before you act.

THE RESPONSE LOOP

- 1 OBSERVE**
Who gives the signal?
- 2 CONFIRM**
Who and what does it affect?
- 3 RESPOND**

THE REVISION HABIT

Pause before answering.

Look for people, vehicles, road position, visibility and direction of movement.

PRACTISE WITH THIS PROMPT

Another road user's action suggests an intention.

What should you not assume - and what would you confirm before responding?

MAKE IT STICK

Five cards. Five minutes.

Cover the self-check, explain your reasoning out loud, then reveal it. The aim is not a magic phrase. It is a safer thinking sequence.

01 SEE THE MESSAGE

Can I identify the kind of message before naming it?

02 ADD CONTEXT

What do the road, people, vehicles and visibility change?

03 SLOW THE ANSWER

Which response reduces uncertainty and risk first?

04 EXPLAIN WHY

Can I connect the message, scene and safe action?

05 CHECK THE SOURCE

Does this detail need current official confirmation?

PICK ONE > NAME THE MESSAGE > ADD THE SITUATION > SAY THE SAFE RESPONSE

READY TO CONTINUE?

Turn revision into a route forward.

Tick what you can explain without guessing. Anything uncertain becomes your next learning task.

☐

I can use notice - interpret - respond on a new scene.

☐

I can explain a road message, not just recognise an image.

☐

I can find the hazard and rule clue before choosing.

☐

I read driver or police signals in context.

☐

I know when to return to current official guidance.

YOUR NEXT THREE STEPS

- 1 **CHECK** current official requirements
- 2 **PRACTISE** with an instructor when ready
- 3 **COMPARE** local schools and ask direct questions

**You do not need
every answer today.
You need a clear
place to start.**
